

Grid Power Token (GPT) White Paper

Executive Summary

Grid Power Token (GPT) is a transformative digital currency created on the Solana blockchain, designed to revolutionize user engagement in the digital space. GPT enables users to earn rewards through activities like gaming, ad viewing, and resource sharing. This white paper outlines GPT's vision, technology, tokenomics, and roadmap, marking a new era in the digital economy.

Introduction

The digital world is evolving, and there's a growing need for a system that fairly compensates user participation. GPT emerges as a solution, offering a decentralized, efficient, and rewarding economic model for users and advertisers in the digital ecosystem.

Vision

Our vision is to create a sustainable, user-centric economy where digital interactions are rewarded, fostering a community-driven platform that values each participant's contribution.

Technology

- **Blockchain:** Solana
- **Smart Contracts:** For reward distribution, staking, and governance.
- **Security:** Advanced security protocols to ensure user and transaction safety.

Tokenomics

- **Token Name:** Grid Power Token (GPT)
- **Total Supply:** 100 Billion GPT
- **Distribution:**
 - 50% Development and Operational Costs
 - 25% User Rewards and Airdrops
 - 15% Reserved for Future Partnerships and Expansion
 - 10% Founders and Team

Allocation Strategy

- **Controlled Release:** Tokens held by the development team will be released into the market at predetermined milestones.
- **Burn Mechanism:** Annual burning of tokens to reduce supply and increase value.

Roadmap

Phase 1: Launch and Establishment

- Q1 2024: Launch of GPT on Solana DEXs.
- Q2 2024: Development of GPT reward mechanisms for gaming and ad viewing.

Phase 2: Expansion and Partnerships

- Q3 2024: Integration with major gaming and advertising platforms.
- Q4 2024: Strategic partnerships for wider ecosystem adoption.

Phase 3: Community and Ecosystem Development

- Q1 2025: Implementation of community governance models.
- Q2 2025: Expansion of GPT use cases in other digital domains.

Phase 4: Sustainability and Innovation

- Q3 2025: Launch of new features based on community feedback.
- Q4 2025: Research and development for future blockchain integrations.

Conclusion

GPT is not just a cryptocurrency; it's a commitment to a more equitable and participatory digital economy. By aligning user activities with tangible rewards and creating a self-sustaining economic model, GPT is set to redefine the value of digital engagement.
